Eurythmy India

### Storytelling Through Eurythmy

Stories have a powerful imprint on the evolution of human consciousness. Whether you heard stories in a history class at school or from your grandmother at home- it influences your relationship with the world around you and yourself. Then there is Eurythmy; an art form that brings balance and allows you to be truly Human. My love for storytelling and Eurythmy has made me curious on how the intermingling of both components can serve humanity. In my thesis you will find the origins, styles, themes of storytelling and Eurythmy. Then I merge both components by framing a eurythmy play within the performance threefoldness, 'the epic', 'lyric' and 'dramatic.
