## THE ELEMENTAL BEINGS

I took as inspiration for this topic the readings of the philosopher Rudolf Steiner. Knowing the origin, action and development of the elemental beings in our world opened to my eyes a window, where a landscape of interrelations of these elemental beings with the human world is vast and constant. With the use of some Eurythmic tools, such as the use of spiritual vision: the will, feeling, and thought to the intuition, inspiration, and imagination to be able to perceive and make use of these relationships between elemental beings and the human world. A cornerstone was missing: to be able to conceive the broad interweaving of the relations between elemental beings and humans. It was then that the ethers came to my knowledge, so the dynamic relationship that exists between elemental beings, ethers and everything visible, came to light. As a consequence, various questions and hypotheses swirled in my daily life, these thoughts and imaginings I share in this writing.
